

MANAGED SECURITY SERVICES

Hilltop Managed Security Services is an advanced security management offering that provides deeper visibility into your IT environment than traditional network monitoring services. We take on the day-to-day defense of your IT network and infrastructure via the deployment and management of advanced security systems and tools, which are monitored in real-time via our 24x7x365 Security Operations Center (SOC).

By combining threat intelligence with event correlation, our managed security services helps you eliminate weaknesses and blind spots by consistently monitoring, managing and remediating security threats and attacks to your network, systems and data. Essentially, Hilltop's Managed Security team becomes an extension of your IT security operations.

Our MSSP services include:

- **vCISO:** Your firm is assigned a dedicated Virtual Chief Information Security Officer (vCISO). This is a high-level Security Engineer who understands your business needs AND your IT systems. The vCISO is uniquely positioned to provide valuable guidance to optimize your IT security posture.
- **24/7/365 Security Monitoring, Detection and Response:** Detection and response to threats and attacks to your network infrastructure around the clock to mitigate potential security breaches.
- **Risk Assessment and Management:** Evaluation of your security practices and technologies to help you minimize risk.
- **Vulnerability Assessment and Management:** Monthly vulnerability scanning of your network to identify potential security holes, with prompt planning for remediation.
- **Compliance Management:** Assistance with organizational compliance in line with your industry's standards and legal regulations.
- **Multi-Factor Authentication:** Implementation of a token-based security solution that confirms if a user is who they claim to be before being granted access to your organization's resources.
- **Advanced Email Security:** High-level email protection to ensure that malicious content is not received and passed on to users in your network.
- **User Security Awareness and Training:** Ongoing security awareness campaigns and annual training sessions on the latest security threats and trends and how to avoid them.
- **IT Security Policy Creation and Yearly Review:** Assistance in the creation of and/or the yearly review of your organization's IT Security Policy to ensure that it meets current regulations.

Partnering with Best in Class:

**REAL IT PEOPLE.
REAL IT SOLUTIONS.
REAL IT PARTNERS.**

WHY HILLTOP?

- We're fast, we're local, we're same day, we're on-site, and we're 24/7 (we really are all these things).
- We are a professional company that you can count on.
- We're all about relationships – every client is our most important client.
- We speak to you in plain English. We simplify where others over-complicate.
- We design and implement solutions that help your bottom line.
- We do smart, not pretty (well, we do pretty sometimes).
- We work with intensity and urgency.
- We have balance (geeks and non-geeks), and we're still small enough to have that personal touch.
- We're always in touch with the latest technology.
- We REALLY have predictable billing where competitors only claim to. For Hilltop flat-rate is FLAT-RATE.
- We offer more than just your average MSP or IT support.
